

# MRF HTML5 Map Server Emergency Notification Extension

The Emergency Notification extension for the MRF HTML5 Map Server allows users to prepare and send mass notifications in minutes, making it ideal for emergency notifications.

-  Select recipients directly from the map
-  Recipients can be called, texted, and/or emailed
-  Capable of over 5000 calls/min
-  Save call lists for repeated use (ex. Dog owner license reminders, events, construction notifications, etc.)

## About MRF

Founded in 1992, we have helped thousands of organizations solve common to complex workflow, coordination, and information management problems using GIS software and systems integration.

We do this by dedicating ourselves first to understanding the issues you are experiencing and then applying innovative combinations of our comprehensive spatial technologies.
