Challenge

Many technology forward organizations have deployed industry-leading, but targeted software and/or hardware solutions. Often the same organization will find itself depending on several similar technology platforms that each solve a very specific problem. Working in these segregated environments unavoidably leads to duplicated effort, over complicated workflows, and other frustrating inefficiencies.

Many organization attempt to address this challenge by replacing all of their separate programs with one do-it-all system, trading one set of inefficiencies for another. No platform can be all things to all team members.

Don't Rebuild, Just Connect

Let us help you improve your technology experience by sharing data and capabilities between your existing systems.

- What if you could view information entered into your SAP system in your ArcGIS Desktop or ArcGIS Online applications?
- What if your work-alone and AVL locations could be made available to all necessary parties from a single web application?
- What if one mobile app could provide all your field users with the information they need regardless of which system or systems manage that data?

MRF has years of experience answering questions just like these and unlocking efficiency in segregated enterprise systems.

About MRF

Founded in 1992, we have helped thousands of organizations solve common to complex workflow, coordination, and information management problems using GIS software and systems integration.

We do this by dedicating ourselves first to understanding the issues you are experiencing and then applying innovative combinations of our comprehensive spatial technologies.

Pricing

Integration projects present unique challenges and opportunities. We handle Systems Integration on a case by case basis to provide our customers with the best value available. Let us help provide a detailed assessment of your current GIS technologies with three levels of improvement suggestions complete with fixed prices. Choose your level of investment and regardless of whether or not you pursue any suggested improvements, the detailed assessment report is yours to keep. If you do proceed with any suggested improvements, the complete cost of your assessment will be applied to your improvement.

Sign up for a detailed assessment today at our promotional price of **\$1500**.
